

Conceptromec de Mexico

PRODUCT CATEGORIES: tooling & machinery, design & engineering

CLIENTS: Tier 1, Tier 2

Design-Manufacture-Assembly Rubber Processing Machinery, High Precision Machining, High Technological Automation Systems' Production and Sales.

Conceptromec specializes in the design and machining of high precision parts for the automotive, mechanical, metal and general manufacturing industries, with a high level of expertise in the design, manufacture, and assembly of projects based on the client's design. Established in 2008, Conceptromec de México designs, produces and commercializes high-tech automation systems for rubber and plastic applications. Conceptromec has performed outstandingly in the design, manufacturing and development of automated equipment for the automotive sealing industry. The company's customers are located in Mexico, the United States, Canada, Brazil, Korea, China and Europe.

Main competitive advantage/differentiator: unique manufacture of Clip insertion Machines in Mexico, with local support.

Products: tooling automated equipment; extrusion conveyors and uncoilers; custom equipment, primarily for the automotive sector; insert machines, automatic notching equipment, semi-automatic notching units, among others. High-precision machining, design, manufacturing and assembly of small machines; manufacture of knives and matrix with EDM, and machining of high precision parts; project assembly: design-manufacturing assembly features for the automotive, pharmaceutical, metal mechanics and manufacturing industries.

PRODUCTS FOR:

Tooling: small, general parts, and other components.

Machinery: small, general parts, and other components.

Design and Engineering: small, general parts, and other components.

Gauges, Fixtures, Jigs: small, general parts, and other components.

CAPABILITIES:

Full range of equipment of ingenious design, effective "just-in-time" manufacturing system, CNC equipment, milling machines, EDM wire, lathe, grinder machines, saw tapes, sand blasting, machines and welders.

Plants: San Luis Potosi, Jalisco

PROCESSES FOR:

Tooling: machining, welding, paint coating, heat treatment, various surface treatment, assembly.

Machinery: machining, welding, paint coating, heat treatment, various surface treatment, assembly, rubber metal parts, rubber injection molding parts, rubber extruded parts.

Design and Engineering: machining, various surface treatments.

Gauges, Fixtures, Jigs: machining, welding, paint coating, heat treatment, various surface treatments, assembly.

MEXICO

Condominio City Park, Av. Aviación
No. 5051, Col. San Juan de Ocotán,
Zapopan, Jal.45019, Mexico.
