

Goss Global Mexico

PRODUCT CATEGORIES:

autoparts, tooling & machinery

CLIENTS: OEM, Tier 1

Manufacture and Development of Plastic Parts, Injection Molding and Thermoforming.

GOSS Auto Parts is a company managed by ZAP & Partners Limited from London, Ontario. We have operations in London, Ontario and Ramos Arizpe, Coahuila in Mexico and are focused to serve the niche of light duty trucks and heavy trucks by manufacturing Auto Parts as Tier 1, using the state-of-the-art technology for injection molding and vacuum thermoforming. The plant also services customers from the commercial vehicles industry by producing plastic components manufactured by vacuum thermoforming. The Santa Maria plant has capacity to run injection molding molds from 200 up to 3,500 Tons and capacity to thermoform components up to 1800 mm by 1200 mm.

Products: class "A" plastic parts for automotive components, both interior and exterior; structural and black plastic components; custom packaging produced from both vacuum thermoforming as well as injection molding processes.

PRODUCTS FOR:

Autoparts: class "A" plastic parts for automotive components, both interior and exterior; structural and black plastic components; custom packaging produced from both vacuum thermoforming as well as injection molding processes.

CAPABILITIES:

Injection and thermoforming capability. ISO certified quality systems. Fully functional in house lab including CMM, color/gloss measurement, enstrom pull force measurement equipment. Tool design and in house tool trials. Offering short term injection press capacity on a full service rental basis. Successful track record of transferring in production injection tooling.

CERTIFICATIONS & HIGHLIGHTS:

ISO 9001:2015; member of INA.

Plants: Coahuila

PROCESSES FOR:

Autoparts: injection molding, vacuum thermoforming, CNC machining, plastic welding, assembly of components, paint coating.
