

Narmx - Narmco Group

PRODUCT CATEGORIES:

autoparts

CLIENTS: OEM, Tier 1

Manufacturer of Stamping (Steel and Aluminium), Complex Assemblies, Roll Formed parts and E-Coat and Powder Coat for the Automotive Industry.

Narmx Queretaro is a subsidiary of Narmco Group, focusing on metal stamping and tooling development. Narmx was established in 2000 and currently provides stampings, roll forming, assemblies, e-coat and powder coated products. The Narmco Group is a financially strong, privately held group of companies located in Canada, the USA and Mexico. With 75 years of manufacturing experience, the company continues to be a leader in the supply of high-quality metal stampings, roll forming, assemblies, and related services to the automotive Industry: presses ranging from 250 to 3,500 Tons, roll forming, laser, plasma, Mig, spot, resistance welding, e-coat and powder coat and assembly. Last but not least, an employee team and culture that delivers.

Main competitive advantage/differentiator: one-stop shop for metal body parts manufacturing, including e-coat, process design and tooling.

Products: body and exterior: modular assemblies for sun roof, doors; floor, engine; dash panel; seat reinforcement; rear panels; heat insulators; fuel tank straps; fuel lid doors; hooks; wheelhouse; front end frames, rolling door frames; guide rails for windows; bumpers; structural stampings, including HSLA and aluminium products and class A parts; multi-component assemblies with rolled, stamped, e-coated and powder coated finished products.

PRODUCTS FOR:

Autoparts: engine, drivetrain, body and exterior, interior, drivetrain system.

Tooling: engine, drivetrain, body and exterior, interior, drivetrain system.

Machinery: engine, drivetrain, body and exterior, interior, drivetrain system.

Gauges, Fixtures, Jigs: engine, drivetrain, body and exterior, interior, drivetrain system.

CAPABILITIES:

Narmx has transfer lines, tandem lines with robotic transfer, and progressive presses with capacities from 250 to 2,300 Tons. The company also has high-precision roll-forming and welding lines (plasma, MIG, MAG, spot, and projection). For painted Class "A" parts, Narmx has e-coat and powder coat lines in-house. E-coat Paint.

CERTIFICATIONS & HIGHLIGHTS:

ISO 14000; IATF; BIQ; VDA 6.3 certification; 2013-2020 GM Supplier Quality Excellence Award of the Year; member of INA and CANCHAM México.

Plants: Queretaro

PROCESSES FOR:

Autoparts: stamping, roll forming, welding, paint coating, assembly.

Tooling: stamping, roll forming, welding, paint coating, assembly.

Machinery: stamping, roll forming, welding, paint coating, assembly.

Gauges, Fixtures, Jigs: stamping, roll forming, welding, paint coating, assembly.

Others: stamping and roll forming: metal finishing, stretch bending, complex roll forming, e-coat paint, full finish powder coat systems. Assembly: manual and robotic assemblies. Various processes: Class "A" material handling and packaging, design.
