

Windsor Mold Group

PRODUCT CATEGORIES:

autoparts, gauges & fixtures

Manufacture and Assembly of Plastic Components.

Windsor Mold was established in Mexico in 2010, and focuses on the manufacturing of plastic components for the automotive industry. At the Canadian headquarters, the service for the design and manufacturing of plastic injection molds and tooling is also offered.

CLIENTS: OEM, Tier 1, Tier 2

Products: plastic injection molds; conventional, multi-material, multi-color tooling, plastic metal hybrid, shuttle molds, co-injection tooling, in-mold decoration, hardened tooling. Gauges and secondary tooling; gauges, assembly and secondary tooling. Plastic products; exterior, underhood, structural, lighting, interior.

PRODUCTS FOR:

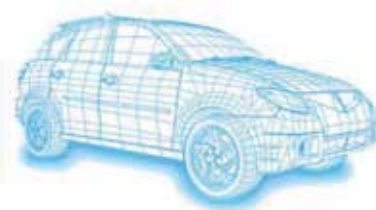

Plastic injection molds; conventional, multi-material, multi-color tooling, plastic metal hybrid, shuttle molds, co-injection tooling, in-mold decoration, hardened tooling. Gauges and secondary tooling; gauges, assembly and secondary tooling. Plastic products; exterior, underhood, structural, lighting, interior.

CAPABILITIES:

Equipped with molding injectors from 750 to 3,000 Tons. Technology and capability that permit services for high ton plastic injection and up to two-shot material injected with horizontal and vertical rotary technology. Overall shop size is 160,000 sq. ft.

CERTIFICATIONS & HIGHLIGHTS:

ISO 14001; IATF 16949; C – TPAT; Ford Q1 / GM Excellence Awards; BIQS Level 5.

Plants: Queretaro

PROCESSES FOR:

Plastic injection; standard injection, multi-shot rotary, robot, shuttle, magnesium injection, compression tools; automatic and semi-automatic assemblies; bulb seal extrusion (BSE), and foam in place (FIP).

MEXICO

Av. Manufacturas No. 612, Parque Industrial, Queretaro, Qro, 76220.
