

AMPHENOL CTI GENASCO

Wiring Harnesses, Cable Assemblies and Electro-Mechanical Assemblies

A division of ACTI specializing in wiring harnesses, cable assemblies, electro-mechanical assemblies, control boxes, cabinets, and value-added solutions and shelter services (manufacturing support services). As a full-service manufacturer, they manage all aspects of the production process, providing engineering expertise, guidance, and solutions at competitive prices. Their customers benefit from ACTI's global network of strategic alliance partners and manufacturing capabilities.

Product categories: autoparts

Clients: Tier 1, Tier 2

Products: cable assemblies; electro-mechanical assemblies; components assemblies; auto cooling system assemblies. Major market served: automotive; heavy equipment; industrial; ATM, banking; telecom; and others.

PRODUCTS FOR:

Autoparts: engine; climate control, HVAC; driving support, security.

PROCESSES FOR:

Autoparts: harnesses, cables.

Others: full process board build; automated wire process; wire cut, strip and crimping,

termination; twisted wire cutting and processing; multi-conductor wire processing; coaxial

wire processing; splicing; soldering; heat shrinking tubing process; ultrasonic welding copper wires; PVC and corrugated tube; braiding; over-molding.

Capabilities: Complete engineering solutions for wiring harnesses and electromechanical assemblies: design, testing, sourcing, support, and value-added. Wire harness technology: real time management system, networking for automatic crimp processes including material verification, setup validation, production data collection, work order scheduling, tool life monitoring and maintenance scheduling.

Certifications and Highlights: IATF 16949; other certifications: UL, CSA, CTPAT, BASC; 103,000 sq. ft. facility; established in 1994.
