

INTEGRITY TOOL & MOLD DE MÉXICO

Manufacturing, Maintaining and Repairing of Plastic Injection Molds, Manufacturing of Plastic Parts

Integrity is the largest tool shop in Mexico. We can deal with the whole process of tool manufacturing, from the design phase (in Querétaro) to local supplies, new mold manufacturing, repair and engineering, changes and implementation capabilities, tool refurbishing and manufacturing of plastic parts.

Main competitive advantage and differentiator: the company is driven to be versatile. Its 11 facilities are designed to collaborate as well as work independently. The volume of Integrity machines and technology means that they can customize and handle the most complicated projects.

Product categories: autoparts, tooling and machinery, design and engineering

Clients: OEM, Tier 1, Tier 2

Products: injection molds: Interior and exterior trim; headlamps, tail lamps; rocker; air dam; grill; cowl; wheel flare; pillar; instrument panels; climate control; HVAC.

Services: new mold manufacturing, repair and engineering change implementation, tool refurbishes, advanced feasibility, mold making (polishing, in-house spotting presses), molding (try-out, overflow part runs, short production runs), landing and LCC support, CNC machining (5 axis high speed machines, gun drilling and 2D machining).

PRODUCTS FOR:

Autoparts: body and exterior; interior; climate control, HVAC, driving support, security, battery, capacitor (EV, HV, HCV), small, general parts.

Tooling: body and exterior; interior; climate control, HVAC, driving support, security, battery, capacitor (EV, HV, HCV), small, general parts.

Design and Engineering: body and exterior; interior; climate control, HVAC, driving support, security, battery, capacitor (EV, HV, HCV), small, general parts.

PROCESSES FOR:

Autoparts: plastic injection molding.

Tooling: plastic injection molding.

Design and Engineering: plastic injection molding, foaming, blow molding.

Others: casting, die casting, stamping, repair and engineering change implementation for plastic molding.

Capabilities: 45,500 kg. (50 tons) crane capacity, large capacity boring mill, 7-axis gundrill, EDM and spotting presses; 24/7 operation for quick-turnaround; 320, 550, 750, 1200, 2300 Tons, 1000 and 2300 tons, 4000 ton injection presses. Full process weld, large saw cutting.

Certifications and Highlights: ISO 9001:2015; IATF; 20 years of experience; +200 skilled team members; Integrity México was established in 2012 and has 158,000 sq. ft. of manufacturing facilities; member of AMMMT.
