

LIBERTY SPRING QUERETARO

Manufacture of Automotive Springs

Liberty Spring is a world-leading precision spring manufacturer offering services to the automobile and recreational product industries. Liberty Spring is a Canadian company with headquarters in Montmagny, Quebec, and more than 700 employees. In 2014, Liberty Spring established its operations in Queretaro, located in the O'Donnell Industrial Park, to efficiently serve its main customers in the region. Liberty Spring also operates four other production sites, located in Toronto (Canada), Boucherville (Elka Suspension, Canada), Suzhou (China) and Giarmata (Romania). They also have representative offices near Detroit (USA) and Berlin (Germany).

Main competitive advantage and differentiator: Liberty Spring engineers are focused on continually developing the materials used in spring manufacturing and have developed their own standards of material quality.

Product categories: autoparts

Clients: OEM, Tier 1

Products: suspension and rebound springs; compression springs, torsion springs, extension springs.

Services: spring manufacturing and painting.

PRODUCTS FOR:

Autoparts: suspension, steering, wheel and tyre, and other components.

PROCESSES FOR:

Autoparts: paint coating, assembly.

Capabilities: Manufacturing capabilities with the latest technologies such as coiling, forming, heat treating, grinding, chamfering, shot-peening, and pre-setting; a test laboratory with state-of-the-art spring measuring and testing systems; assembly capabilities.

Certifications and Highlights: IATF 16949:2016

CONTACT

México: Av. El Tepeyac No. 1420-F, P.I. O'Donnell-Aeropuerto, El Marqués, Qro. 76250, México.
